

## ENVIRONMENTAL POLICY STATEMENT

Roger Preston & Partners recognises that its operations have an effect on the local, regional and global environment. We are committed to the need for conservation and sustainable use of natural resources associated with our business activities and through the project work undertaken for our Clients.

To these ends we have implemented environmental management system procedures as part of our Integrated Management System to continuously improve our environmental performance. This commitment is demonstrated by the following objectives:

- To ensure compliance with all applicable legal requirements.
- To reduce emissions and prevent pollution.
- To improve our waste management practices.
- To reduce our consumption of natural resources.
- To minimise noise and other nuisances.
- To assist in the management of ecology.
- To continually assess our environmental performance.
- To assist in the investigation of environmental incidents in which we are involved.
- To make our environmental information available to interested parties.

The necessary personnel and financial resources are allocated to assist us in meeting our environmental objectives and targets and are reviewed on a regular basis. In addition we continue to raise the level of awareness of our environmental approach both within our Company and also with our Clients, Sub Contractors and Suppliers.

Within our project work Roger Preston & Partners subscribe to the concept of environmentally aware design and will support the activities of the entire development team in meeting this objective. In our design approach we are committed to reducing the impact of our own activities on the environment and assisting our clients and others by encouraging them to use sustainable resources.

We remain committed to operating our environmental procedures in a manner that attains and sustains compliance with the International Environment Management Standard BS EN ISO 14001:2004.
